

ROAD SAVER

Dust Control and Road Base Stabilization

Maximum cost effective dust control and road base stabilization agent

- Content:** Magnesium chloride, solar evaporated from the Great Salt Lake.
- Advantages:** Maximum cost effective solution for dust control and road base stabilization for roads with normal size and particle distribution.
- Proven performer for large commercial operations, private industry, military and government agencies.
- Effective in high and low humidity conditions.
Non-toxic and safe for environment.
- Disadvantages:** Must have a good road base and adequate clay for product to be effective. (See sheets on dust control facts and sieve charts.)
- Too much clay in road base can cause base to hold excessive water.
- Manufacturer:** US Magnesium Corporation.
- Application:** Professionally applied with EnviroTech specialists.
Application can be made with existing equipment.
- Appearance:** Clear to slightly yellow, odorless liquid.
Road surface will initially appear moist, then gradually appear to dry.
